

FLIP-FLOPS TECHNICAL SPECIFICATIONS

! SHOT ADJUSTMENT MODE

Its exclusive design with rounded edges makes them avoid scratches.

Another difference is that the strips can be adjusted, adapting to the different types of foot width, just by pressing them.

! SURFACE DRAWING SPECIFICATIONS

Its unique non-slip design provides safety and improves footing. It has a line drawing to facilitate the flow of water.

A wavy pattern to favor the grip of the ground and reduces the possibility of sliding in the lateral movements.

Its two-way wave-shaped drawing improves adhesion on uneven terrain.

Certified by INESCOP (Institute of Footwear and Related Technology)

! ARTIFICIAL TURF SPECIFICATIONS

The artificial grass used is of high quality with 15,750 stitches / m2, 11,500 Dtex, in Polyurethane (PU) and Polypropylene (PP). Resistant to water and sun, soft, fluffy, fluffly and 32mm.

! RIBBON SPECIFICATIONS

Differentiating element of our handmade flip-flops and avoiding the backing (stuck to the base of the lawn).

**** All TURFGOODS flip-flops have been manufactured by hand and in Spain. ****
